Tenkasi, Tamil Nadu, India

OBJECTIVE

Final-year B.Tech (CSBS) student experienced in building backend applications using Python, FastAPI, and Java. Have worked on projects involving LLM integration, RAG systems, and workflow automation. Eager to contribute to building potential AI solutions that solve real-world business problems.

EDUCATION

B.Tech – Computer Science & Business Systems (CSBS) 2023 – 2027

Panimalar Engineering College, Poonamalle | CGPA: 8.3

Class XII 2022 – 2023

Darussalam Higher Secondary School, Kadayanallur | 80%

SKILLS

Languages

Python, Java, SQL

Frameworks & Libraries

FastAPI, LangChain, Ollama, REST APIs, NLTK, TextBlob

Developer Tools

Git, GitHub, Postman, n8n, VS Code

Databases

MySQL, ChromaDB (Vector DB), SQLite

EXPERIENCE

AI & Automation Intern – Zappo Fashions (Remote) Jul 2024

- Designed and deployed an automation-based customer care bot handling order queries, FAQs, and support using LLM integration and workflow orchestration, reducing manual support load.
- Integrated REST APIs for real-time order tracking, customer interaction logging, and automated response generation — gaining hands-on exposure to production-grade API pipelines.

PROJECTS

RAG-Based AI Knowledge Assistant Jul 2025

Python, FastAPI, Ollama, LangChain, ChromaDB, REST APIs

- Built a Retrieval-Augmented Generation (RAG) system using Ollama, LangChain, and ChromaDB for local LLM inference; implemented document chunking, embedding generation, and vector similarity search for accurate, context-aware responses.
- Engineered scalable FastAPI endpoints for AI-powered query handling, designed modular backend architecture for efficient retrieval pipelines, and optimized response latency for production-ready deployment.

AI Customer Support Agent & Learning Assistant Dec 2025

Python, FastAPI, Ollama, n8n, REST APIs, JSON

- Developed an LLM-powered customer support agent integrating third-party REST APIs for order tracking, FAQs, and interaction logging; structured JSON-based request/response handling ensured reliable, context-aware conversations.
- Automated query routing and response generation using n8n workflows, orchestrating API calls and backend logic to reduce manual intervention and improve operational efficiency — a workflow pattern aligned with Hexaware's automation-led service model.

Sentiment Analyzer Pipeline Jan 2025

Python, n8n, NLTK, TextBlob, REST APIs

- Built an automated sentiment analysis pipeline using Python, NLTK/TextBlob, and REST APIs; performed data scraping, text preprocessing, tokenization, and polarity-based classification.
- Implemented n8n-based workflow automation for continuous data processing, structured tagging, sentiment scoring, and streamlined reporting — demonstrating ability to build end-to-end business intelligence solutions.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate - Exp: Jul 2027

Oracle Cloud Data Management 2023 Certified Foundations Associate - Exp: Jul 2026

Retrieval Augmented Generation for Production with LangChain & LlamaIndex - June 9 2026

Gen AI Certification - Preplnsta Technologies PVT. LTD - 7 June 2026

LEADERSHIP

Math Club Coordinator 2024-2026

YRC -Dept Coordinator 2024-2026

Organized PEC HACKS 3.0 2025 Dec

ACHIEVEMENTS & EXTRACURRICULARS

- Winner – Intercollege 'King of Coding' Competitive Programming event conducted by Spiders, demonstrating strong DSA and problem-solving skills.
- Passionate footballer with district-level appearances
